Yves Wortel

YA / MixCheck

Installation / 1.0.0

Apple Silicon (M1 or later), running macOS 15 or later.

---

1 Drag to Applications

Open the DMG. Drag YA-MixCheck to the Apps shortcut.

2 Open from Applications

Open YA-MixCheck from Applications, outside the DMG.

You can then eject the DMG.

Does macOS block the first launch?

This version is not notarized by Apple.

After trying to open it, go to System Settings.

Select Privacy & Security and scroll to Open Anyway.

Click Open Anyway, then confirm with Open.

Only do this for the package received from Yves or this repository.

Ready. Drop an audio file into the app to get started.

The 1.0 app interface and reports are currently in Dutch.
